Feminist Practice in the 21st Century

Nan Van Den Bergh, Editor

This current, comprehensive compendium on feminist social work will help women combat workplace discrimination, create practice strategies that support women, and increase the use and acceptance of feminist management approaches. Covers topics such as homelessness, AIDS, substance abuse, and nuclear disarmament from a feminist perspective. Chapters examine women's organizations, women's view of power, and feminist worth in the workplace to set forth a feminist model in social work theory and practice.
